The new era of

CONTRAST

COMPLX

Creating balanced contrasts

This catalogue is the culmination of a year's creativity and with which we'll open a new era at Viefe as regards design, new finishes, new materials and new product lines. We are defined by contrasts and they are the essence of the new collection which transmits informality, class and resounding simplicity. Sophisticated and practical, eclectic by nature, our exceptional products completely transform the usual user experience.

**FROM
VIEFE**

***around
the world***

Singular products for plural tastes

Interior design professionals and architects from all around the world trust in our products for their projects, and of course individual customers. At Viefe they can find a wide variety of eclectic, decorative accessories which adapt to different tastes and lifestyles. Our designs transform all types of spaces and transmit the personality of whoever lives in that space.

Designers that **BREAK THE RULES**

Creative collaborations across Europe with international designers

We collaborate with designers from all over the world who help us to give shape to our avant-garde products. Their restlessness and sensitivity to aesthetics leads us to readdress established design norms. With them by our side, we break the rules and we look for new ways to express ourselves which can be seen in our knobs, handles and other products. Together we innovate materials, reformulate finishes and create new trends. Their inspiration is an added impulse to us.

RESPECT *for the environment*

Small steps for a great cause

We take the health of the planet very seriously as well as the impact of our manufacturing processes on the environment. Our policy of environmental awareness has led us to take measures over the years in order to be more sustainable. Since 2022 we have been working with 100% renewable energy sources and we have significantly modified the materials that we use for our packaging, opting for the use of paper over plastics and non-recyclable materials as far as possible. The ISO 14001 certifies our company as one which has below average carbon emissions.

DISPLAY *boards*

See and touch

On the display boards that you can see here below, all the different models of knobs and handles that we have available can be seen along with the finishes and some of the more representative measurements. So you have an idea of the dimensions of the products: each display board measures 20 x 15 inch and the long one 20 x 63 inch.

Product reference included on every display board.

Some display boards do not include the complete range of products from the collection. Please read carefully the notes placed on each one.

Viefe Display Towers. Make the difference!

Our towers are designed to display up to 32 boards. This innovative system is designed to be versatile and to fit to our customers possibilities and needs. You can adjust the display options taking into consideration your space. The standard set-up (one tower) lets you display 8 boards with less space and add the long version to promote these unique handles. Moreover, you have different options to present the towers so you can adjust the style to your showroom. With a European design, these towers are easy to assemble and are sold and sent separately with instructions included.

Finishes

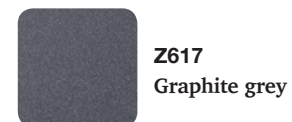

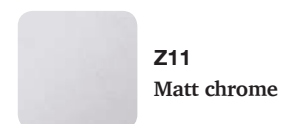

IMPORTANT NOTICE: The finishes that you see represented in this section are a digital simulation of the real finishes and in no way can they be used as a reference for physical comparisons. The aim of this index is to guide and inform the user about the finishes we work with. The finishes of all our models are defined exactly as is indicated in the catalogue and therefore are in no way characteristics that can be personalized.
